Thanks Alan

I concur.

I appreciate the email. Can you send a pdf file version ? We can call it 'Operations and Maintenance Plan Final Inspection and Request for No Further Action'.

You can acknowledge UC approvals and dates rec'd in the pdf then upload it.

I'll write my POLREP shortly after that which will complete the Federal response. Any further action will be conducted under DEQs oversight.

I am interested in the work that CK did for you concerning in situ remediation. Is that report available yet?

Thanks

Subject: Plains at Stevens Facility Oil Spill - Request for NFA

Unified Command ('UC')
Mr. Ernie Shirley - SOSC
Mr. Leo Francendese – FOSC
Mr. Duane Nottingham – RPIC

On behalf of the 'Plains' Marketing, LP – RP, we respectfully submit - -

The Unified Command walked through Divisions A, B & C of the “Plains at Stevens Facility Oil Spill” site on 10/3/2014, which was the end of the IAP Operation Period and the “Observation & Maintenance Plan”... The scoop of the visit was to “Determine whether, or not, there are any long term goals / end points / long term participants”...

Participants present on 10/3/2014:

Mr. Ernie Shirley – SOSC (who also represented the FOSC),

Mr. Duane Nottingham – RPIC

Mr. Allan Schoen – RP – Liaison

Mr. Jimmy Welch RP – Operations Chief,

Mr. Wade Bryant – Environmental

Mr. Rynn Tyler – RPIC-R

Just prior to the visit the site had received a 0.5+ inch of rain. There was no visible free phase product or sheen observed in all three Divisions and there was a lot of emerging vegetation observed in Division A and Division C. Per the recommendations and observations made during “UC” visit on 10/3/2014, 'Plains' request concurrence that the goals of the IAP and O&M plan had been met and that “no further action” be required at the site known as “Plains at Stevens Facility Oil Spill”, with these exceptions:

(1) 'Plains' will maintain the Oil Shark® Fence and perform inspections after storm events that produce >0.5 inches of rain in a 24 hour period until 10/17/2014; and,

(2) John Mark Henderson, MDEQ Haz Mat SOSC-R, will set up a time in the spring 2015 to look over Division C to evaluate vegetative growth.

The UC agreed that the pom-pom type adsorbents can be removed now, but the Oil Shark® Fence and boom will remain intact until 10/17/2017, at which time all the components may be removed...

Regards,

Allan Schoen
