

AIR MONITORING:
 EPA conducted handheld air monitoring from March 27, 2019 (4:00 am) to March 27, 2019 (12:00 pm) at seven locations. No results above the detection limit have been observed.

ASPECT:
 The Airborne Spectral Photometric Environmental Collection Technology (ASPECT) aircraft found no exceedances of the Texas comparison values on March 27, 2019 during Flight 14. ASPECT has conducted a screening level assessment to evaluate the unreported or undetected releases of hazardous materials or contaminants at the Intercontinental Terminal Company (ITC) in Deer Park, Texas. The screening level results from ASPECT were compared to the ASPECT list of Texas Commission on Environmental Quality (TCEQ) short-term Air Monitoring Comparison Values (AMCVs) and found no exceedances of the short-term AMCVs. Isobutylene was detected by the ASPECT at a value less than the AMCV.

SURFACE WATER SAMPLES:
 EPA conducted surface water sampling on March 27, 2019 during reporting period 18 at seven sample locations. Samples were collected from upstream the confluence of Buffalo Bayou and the San Jacinto River in the Old River (at River Terrace Park, Channelview, Texas), confluence of Buffalo Bayou and the San Jacinto River (at the shoreline of Juan Sequin Historic Park), in the main channel of the San Jacinto River just upstream the confluence with Buffalo Bayou, and downstream in the San Jacinto River. The surface water samples will be analyzed for PFAS, VOCs, SVOCs, COD, and Oil and Grease.
