

TAGA:
 EPA conducted air sampling using the Trace Atmospheric Gas Analyzer (TAGA) on March 27, 2019. The TAGA analyzed the air samples for benzene, toluene and xylene. The TAGA air sampling results were compared to the Texas Commission on Environmental Quality (TCEQ) short-term Air Monitoring Comparison Values (AMCVs) and found no exceedances of the short-term AMCVs for toluene and xylene. The TAGA air sampling results found exceedances of the short-term AMCV for benzene (0.18 ppm). These exceedances of the short-term AMCV for benzene were located northwest of the ITC site and have been shared with unified command and local officials.

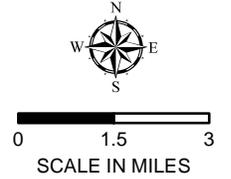

| Substance | CAS # | Short-term AMCV Health (ppb) |
|------------|-------------|------------------------------|
| benzene | 71-43-2 | 180 |
| m/p-xylene | 179601-23-1 | 1700 |
| o-xylene | 95-47-6 | 1700 |
| toluene | 108-88-3 | 4000 |
