Today 9:28 AM

Ms. Bends, we'd still really like to talk with you about granting access for EPA to perform an assessment and removal of the drums at your property. Please contact me at your earliest convenience to discuss by phone. If we haven't heard from you, or received a text by October 30 confirming that we can access the property, we will consider access denied and consider other options available under CERCLA to get access, which could include issuing an administrative order to obtain access.
