

3:44

letter dated August 20, 2020 sent to you by mail and UPS. If you are unable to perform a proper disposal of the drums, EPA requests that you allow us access to perform a removal under CERCLA. Do you consent to allow EPA access to the property for a drum removal?

I have been quarantined unable to do anything. Will get to it when I can.

Ms. Bends, This situation has been going on far longer than the COVID situation, and the open ended response of "I'll get to it when I can" simply is not acceptable given the proximity of the drums to water, and the deteriorating condition of the drums. Rather than continue this texting conversation, we'd really like to get on the phone so we can discuss addressing the drums in a manner that will ensure protection of human health and the environment. Please provide a time that I can call you. Thank you.
