Comments
Start and stop times for each air monitoring instrument varies. The monitoring period is based on the earliest start time and latest stop time out of all units.
1 - Site-Specific Public Health Screening Levels are based on 1-hour time-weighted averages and were established by ATSDR. Fixed discrete monitoring readings are discrete readings, and so do not represent conditions over a full 1-hour period.
2 - PM <sub>2.5</sub> and PM <sub>10</sub> exceedances of site-specific screening levels were observed at the fixed discrete air monitoring locations during the monitoring period. There was no active fire, smoke or site activities conducted at the facility during the monitoring period.

## Notes:

CO - Carbon Monoxide  
H<sub>2</sub>S - Hydrogen Sulfide  
LEL - Lower Explosive Limit  
HF - Hydrogen Fluoride  
mg/m<sup>3</sup> - milligrams per cubic meter  
O<sub>2</sub> - Oxygen  
PM<sub>2.5</sub> - particles that are 2.5 micrometers and smaller  
PM<sub>10</sub> - particles that are 10 micrometers and smaller  
ppb - Parts per billion  
ppm - Parts per million  
VOC - Volatile organic compounds
