

Trowbridge Dam Area Cleanup 2022 Update

We continue to plan and prepare for dredging of PCB contamination from the river, now expected to start in 2023. This year, workers will establish access roads on the north side of the river and bring power into the staging area on 26th Street. The river and floodplain areas are expected to stay open to recreation throughout 2022. For more information, visit the project website at the QR code or contact: www.response.epa.gov/trowbridgedam.
